This is the first office action for application number 10/807,506, Wall Hanging Adjustable Mount and Method, filed on March 23, 2004.

*Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to an adjustable mounting for a wall hanging, classified in class 248, subclass 479.
- II. Claims 11-12, drawn to a method of mounting a wall hanging to a wall, classified in class 40, subclass 747.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product does not necessarily need to be rotated before mounting of the wall hanging.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to John Benefiel on February 14, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
